# Requirement Origin

# Maintenance Function

11-4043-16.4

A means is required to protect pendant during storage

11-4059-64.1

A means is required to use bags with hot or cold water in them to test environmental control system

12.0-4063-44.4

Lower sensor temperature when ambient temperature is above 65°F

-8.6

Provide heat source and heat sink to check opening and closing of the switch. Temperature range: 50°F to 90°F

12.0-4075-35.2

Provide heat source and heat sink for temperature indicating system

-38.3

control, operating power 110V, 236 watts max.

### Soldering Guns:

FSN: 3439-801-1956 (BP) P/N: D550

Weller Electric Corp., Easton, Pa.

200/275 watts

FSN: 3439-554-1829 (BP)

0.125 in. wide chisel pt., threaded type fastening, operating power 110V  
10.5" long, 6.0" wide, 2.0" high, with pistol grip handle

### Heat Dissipator:

FSN: 3439-737-0019 (BP)

Avtron Mfg. Inc., Cleveland, Ohio

1.44" long, 0.26" wide, 0.68" high, grips wire lead of electrical components  
during soldering operation

### Soldering Torchkit:

FSN: 3439-542-0531 (BP)

Brass burner, flame regulating knob, metal case, disposable fuel cylinder,  
flame spreader, light and medium flame tips, soldering iron tip, lighter  
and instructions.

#### Maintenance Function

Used to protect personnel during following operations:

Assemble elevator, work cage, and safety harness.

Reinstall elevator, work cage and supports after missile emplacement

Disconnect guidance and control section umbilical

Disconnect G&C and skirt umbilicals

Disconnect G&C umbilical

Remove and stow elevator work cage into support assembly

Re-install elevator and work cage from equipment room

Remove elevator and work cage from launch tube and stow in equipment room

Remove adapter stabilizing ring

Safety belt for personnel disconnecting hoses

**Safety protection for personnel about Launch Tube**

Protect personnel working on pole or building mounted floodlights

Close Launcher Closure
